-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Non-Responsive Amendment

Under 37 CFR 1.111, the Applicant's response to the Office Action should be complete and must address all the issues raised by the Examiner. In the last Office Action, the Examiner, in the Claim Objections section, stated that "**after independent claim 1, all dependent claims should refer to The expendable supplies providing method instead of An expendable supplies providing method...**". However, in the current response, the Applicant has failed to amend the dependent claims as suggested. Applicant is herein given one month to respond to this correspondence.

Furthermore, in reply to the Applicant's response, please find the following-

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-14, drawn to an advertisement management step for managing advertisement information, a distribution step for generating distribution information, an update step for updating a print point and a determination step for determining whether or not expendable supplies should be provided.
 - II. Claims 15-26, drawn to a method of and a system for reading supplies lists indicating a plurality of kinds of expendable supplies and a consumption point required for providing each item of expendable supplies to generate, in HTML format, expendable supplies provision information including said expendable supplies lists and said obtained print point and for transmitting said generated expendable item provision information to a client user via the Internet.
- 

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed. The subcombination has separate utility such as reading supplies lists indicating a plurality of kinds of expendable supplies and a consumption point required for providing each item of expendable supplies to generate, in HTML format, expendable supplies provision information including said expendable supplies lists and said obtained print point and for transmitting said generated expendable item provision information to a client user via the Internet.

Because these inventions are independent or distinct for the reasons given above and the inventions require a different field of search (see MPEP § 808.02), restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

Art Unit: 3622

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Conclusion

Any inquiry concerning this communication from the Examiner should be directed to Jean D. Janvier, whose telephone number is (571) 272-6719. The aforementioned can normally be reached Monday-Thursday from 10:00AM to 6:00 PM EST. If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's Supervisor, Mr. Eric W. Stamber, can be reached at (571) 272- 6724.
